

3 Months Certification Course

Syllabus 2026

.NET Azure Cloud

Prepared By:
TECH ENGINEER, Mohali

This DotNet Azure program is designed to provide complete practical knowledge of online and offline dev tools and strategies. Students will learn how to work with Azure Cloud environment and build successful careers.

PROGRAM IS BEST SUITED FOR

Entrepreneurs

College Students

Marketing Professionals

Job Seekers

WHY YOU SHOULD LEARN (.NET Azure Cloud)

Key Reasons to Learn Cloud Applications:

- **Versatile and Cross-Platform:** With the modern, unified .NET, you can build many different types of applications, including web apps (ASP.NET Core), mobile apps (.NET MAUI), desktop software (WinForms, WPF), cloud-native services (Azure integration), games (Unity engine)
- **High Performance and Scalability:** .NET is known for being fast and efficient, consistently ranking well in performance benchmarks.
- **Active Community and Microsoft Support:** The platform is backed by Microsoft's significant investment and a large, active, and global open-source community.

You should learn .NET because it is a **versatile, high-performance, and widely adopted platform** that offers strong career opportunities and a comprehensive ecosystem supported by Microsoft and a large open-source community. It allows you to build a vast range of applications across different platforms.

Module 1 – Cloud Fundamentals

- Cloud Computing Basics
- Azure Overview

Module 2 – Azure Services

- Azure App Services
- Azure Storage
- Azure SQL

Module 3 – Deployment

- Deploy .NET Web Apps
- CI/CD Pipelines

Module 4 – Cloud Security

Identity Management
Monitoring

Project:

Cloud Hosted Web Application

Certificate

Upon completing this Certification course, you will receive a program completion certificate from Tech Engineer, Mohali (Pb). This certificate will testify to your skills as an expert in the completed course.
